

# Tariff for Power consumption

Version 1.3.0

Date	Status
06/05/2022	Version 1.0.0 available for public consultation (06/05/2022 – 06/06/2022)
30/11/2022	Version 1.1.0 reflecting the update of the power consumption tariffs applicable as of 01/02/2023
21/12/2022	Version 1.2.0 reflecting the update of the power consumption tariffs applicable as of 01/02/2023
18/12/2023	Version 1.3.0 reflecting the update of the power consumption tariffs applicable as of 01/12/2023 (tariffs rectification)

## Tariff applied by POST Technologies for Electric Power Consumption

For some of its offers, POST Technologies provides electric power facilities to its customer and charge the consumption.

As the cost of electricity can vary according to the market, POST Technologies will update the monthly charge and perform a billing correction at the end of each year, the recalculation will be based on the difference between the estimated market value and actual quarterly average value. For any variation exceeding 2% POST Technologies will publish the new rate in this document.

### Estimated and Actual market Value:

Estimated Market value (€/KWh)	Estimation period	Actual Market value (€/KWh) Quarterly average	Application period
0,15128	Until 31/01/2023	0,15128	Until 31/01/2023
0,47500	From 01/02/2023	0,51354	From 01/01/2023 to 31/03/2023
		0,23697	From 01/04/23 to 30/06/2023
		0,21321	From 01/07/2023 to 30/09/2023
		0,22992	From 01/10/2023 -
0.22992	From 01/01/2024	-	-
