Subject: National public consultation RIO from November 21st to December 21st 2017: Statement

Dear Mr Bohnenberger,

We gladly answer concerning the National public consultation "Reference Interconnect Offer (RIO)" from November 21st to December 21st 2017.

You describe in the RIO with the version 20.11.2017 under "5.2. Tariffs Applicable to the Terminating Access Service of Calls Originating outside of the EEA", point 3) the following:

"Termination of calls with A-Number not belonging to any of the Country Codes included in Table 1 or Table 2, with no A-number (no CLI), with incorrect A-Number (either in format or content), invalid A-Number, modified or manipulated A-number : POST Technologies will apply a surcharge of 12 €cts/min."

We recommend a surcharge of 20 €cts/min. instead of the described 12 €cts/min. [cf. 5.2.- 3)].

We estimate that this increase of surcharge is necessary to achieve the objectives aimed by the classification of Country Codes not belonging to Table 1 or Table 2, without A-number (no CLI), with incorrect A-Number (either in format or content), invalid A-Number, modified or manipulated A-Number.

We stay at your disposal for any further information.

With best regards / Freundliche Grüße

Stefan von Arx
