

Tariff for Power consumption

Version 1.0.0

Date	Status
06/05/2022	Version 1.0.0 available for public consultation (06/05/2022 – 06/06/2022)

Tariff applied by POST Technologies for Electric Power Consumption

For some of its offers, POST Technologies provides electric power facilities to its customer and charge the consumption.

As the cost of electricity can vary according to the market, POST Technologies will update the monthly charge for any variation exceeding 2% and publish the new rate in this document.

The following table provides the triggering values and the evaluation period on which the rate is calculated.

Market value (€/KWh)	Application period	Variation value for a new publication		Publication period
		-2%(€/KWh)	+2%(€/KWh)	
0,15128	From 01/01/2022 to -/	0,14825	0,15430	06/06/2022 - /

1.1. Current rate:

Period of application from 06/06/2022 until a new publication

Main Power circuit (installed fuse in A)										
		10	16	20	25	32	50	63	80	100
Measured current	5	53,04	73,10	86,47	103,18	126,58	186,76	230,22	287,05	353,91
	10	72,65	92,71	106,08	122,79	146,19	206,37	249,83	306,66	373,52
	16		116,24	129,61	146,32	169,72	229,90	273,36	330,19	397,05
	20			145,30	162,01	185,41	245,59	289,04	345,88	412,74
	25				181,62	205,02	265,19	308,65	365,48	432,34
	32					232,47	292,65	336,11	392,94	459,80
	50						363,24	406,70	463,53	530,39
	63							457,68	514,51	581,37
	80								581,18	648,04
	100									726,48

The rate applied for the air-conditioning being proportional to the main power circuit consumption, it will be modified in the same proportion.

The rate for the backup circuit is not affected by this publication.
